

## Microsoft Edge – Internet Explorer Compatibility

In June of 2022 Internet Explorer is being retired and will not be available for users. Historically this browser is needed to navigate STAR to see the drop downs.

Microsoft Edge (and other browsers) have a compatibility option. In order to use Edge, the following steps need to be taken:

1. Open Microsoft Edge.
2. Type in the STAR web address <https://fhsstar.mcmaster.ca/STARCV>
3. Go to the three dots at the top right-hand corner of the browser window and drop the option box down. Choose Settings and then Default Browser. There is information about Internet Explorer compatibility to set up.

4. Once you have this set up, you will be able to reload in Internet Explorer mode. When you open the page in Edge again, you can go to the settings (the three dots at top right corner and drop the box down. The option for reloading is in the image below.
